1. Safety and Maintenance

1.1 Introduction

Thank you for buying your Burg 7 watch phone. To get familiar with your watch phone please read the manual carefully. In addition to basic call functions.

1.2 .Safety Warnings and Precautions

Please read these notes carefully before using the watch phone to ensure the safe and correct use.

1.3 Notes on using the watch phone

- Your watch phone can only use the battery and charger provided by Burg. The use of other products may cause battery leakage, overheating, bursting and fire.
- Please switch off the watch phone in the places where cell phones are prohibited such as:
 - During a flight
 - In hospitals

Because the watch phone may affect electronic equipment and medical devices. Please follow the relevant provisions while using watch phone in these areas.

- Do not use your watch phone while driving. Please stop the car before making or answering phone calls.
- Do not use your watch phone at gas stations (repair station) or near flammable substances, or chemical agents; it might cause a fire.
- Do not use the watch phone near weak signal or high-precision electronic devices. Radio wave interference may cause miss-operation of electronic equipment and other issues. Especially in the vicinity of the following equipment: hearing aids, pacemakers and other medical electronic equipment, fire detectors, automatic doors, and other automation devices. Consult Burg or a local vendor for the affect that watch phones can cause on pacemakers and other medical electronic equipment.
- Do not press hard on the liquid crystal display or use it to hit other things, otherwise it will result in broken LCD panels and liquid crystal fluid leakage. If the liquid crystal fluid goes into the eye it can cause blindness. In this case, please immediately flush eyes with water (do not rub the eye) and seek medical treatment immediately.
- Do not demolish or modify the watch phone, otherwise it will cause damage to cell phones, electricity leakage and electrical fault.
- Keep the watch phone away from magnetic card and other magnetic objects; watch phone radiation wave may remove information stored in floppy disk, savings cards or credit card.
- Contact with water or other liquids may cause overheating, leakage and failure of the phone.
- Do not put batteries, the watch phone, charger in the microwave oven or high pressure equipment. It may cause circuit damage, fire or other accidents.
- Do not use the watch phone near flammable and explosive gases. The use of the watch phone in this situation may lead to failure and cause a fire.

- Do not put the watch phone in a place with high temperature, high humidity or a large number of dusts. It may cause malfunction.
- Place the watch phone in a place where the children cannot access easily to prevent them from injury.
- Do not place the phone on uneven or unstable table to prevent failure or damage of the phone.
- Working condition: temperature 5°C~40°C; humidity: 35%~85%.
- If possible, don't use the watch phone near an ordinary telephone, television, radio and office automation equipment so that it will not affect the function of these devices or the watch phone itself.

1.4 Notes on using the battery

- Do not throw the battery into fire, otherwise it will cause the battery to catch fire or burst.
- Do not use wires, needles or other metal objects to short-circuit the battery; this can lead to battery leakage, overheating, bursting or fire.
- Do not weld the battery terminals; otherwise it will lead to leakage, overheating, bursting or fire.
- If the battery fluid may cause blindness if in contact with eyes. In case this accident happens, please do not rub the eyes, use clean water rinse, and seek medical treatment immediately.
- Do not disassemble or modify the battery, it may lead to battery leakage, overheating, bursting and fire.
- Don't use or place battery near to fire or a high temperature device such as heater, it may lead to battery leakage, overheating, bursting and fire.
- If the battery warms up, the color or shape of the battery changes or other anomalies happen during usage, please stop use and return the watch phone to your Burg selling point.
- If the battery liquid ran into the skin, clothing, which may cause skin burns, immediately rinse with water, if necessary, please seek medical treatment immediately.
- Do not damp the battery; it may lead to battery overheating, smoke and corrosion.
- Do not place the battery direct under the sunlight or near the hot areas in a car, it may lead to fluid leakage and overheating, and may reduce performance and shorten service life.
- Do not throw old batteries in the general garbage. Follow the instructions of a battery disposal place.
- Do not charge more than 24 hours at one time.

1.5 Notes on using the charger (optional)

- Short-circuit of battery charger will cause electric shock, smoke and damage to the charger.
- Please do not use the charger when its cable is damaged, otherwise it will lead to fire and electric shock.
- Please clean accumulated dust on a power outlet.
- Please do not place any water container etc. next to the charger to prevent overheating, leakage and failure caused by water spills,
- If the charger comes in contact with water or other liquids, immediately pull off the charger from the power outlet to prevent overheating, fire, electric shock and charger failure.
- Please do not demolish or convert charger, otherwise it will lead to personal injury, electric shock, fire and charger damage.

- Please do not touch the charger, cables or power outlet when hands are wet, otherwise it will cause an electric shock.
- Do not place heavy objects on the charger cable or modify it; otherwise it will create electric shock and fire.
- Please pull out the power plug when cleaning or maintaining the power plug.
- Do not pull the cable of the wire; it may cause an electric shock or fire.
- Do not charge the mobile in the following circumstance: under direct sunlight; temperature

Below 5 °C or above 40 °C; humid, dusty or with too much vibration (will cause failure); vicinity of TV sets, radios and other electrical appliances (will affect the image, sound effects).

1.6 Cleaning and maintenance

- Watch phone, batteries and charger are not waterproof, do not use in the bathroom or places with high humidity, avoid damp by rain for the same reason.
- Do not wipe the watch phone with alcohol, thinner or benzene solution.
- Plug with dirt will cause mal-contact and loose plug which affect the charging effect. Clean regularly.

2 Instructions before use

2.1 Specification

Network :	GSM900MHz/DCS1800MHz
Screen :	LCD
Operating voltage :	3.7V-4.2V
Battery Capacity :	430mAh (Prevail in-kind)
Standby time :	48hours
Talk time :	1 hour -2 hours (depending on network)

* Standby time and talk time can vary due to SIM card / network settings and usage

2.2 Mobile appearance

2.3 Key Description

On / Off key	<ul style="list-style-type: none"> • Press and hold to switch on/off. • In menu mode, press to go back to standby mode. • End a call or reject phone calls.
Dial key	<ul style="list-style-type: none"> • In standby mode: Press to go to recent calls • Make / receive phone calls • In standby mode, press this key to enter the main menu • In the menu interface, this key performs as "select" or to confirm the operation.
Return touch key	<ul style="list-style-type: none"> • In menu mode, press to access a top menu.
Scroll down touch key	<ul style="list-style-type: none"> • Scroll one line down
Scroll up touch key	<ul style="list-style-type: none"> • Scroll on line up
OK touch key	<ul style="list-style-type: none"> • In the menu interface, this key performs as "select" or to confirm the operation.

2.4 Watch face

The watch face shows the different functions of your Watchphone. This includes three parts:

The top area shows one or more of the following status icons:

The middle area indicates messages, indication and other input content, including numbers, words and dynamic icons.

The Bottom area has two divisions: two icons and four function icons.

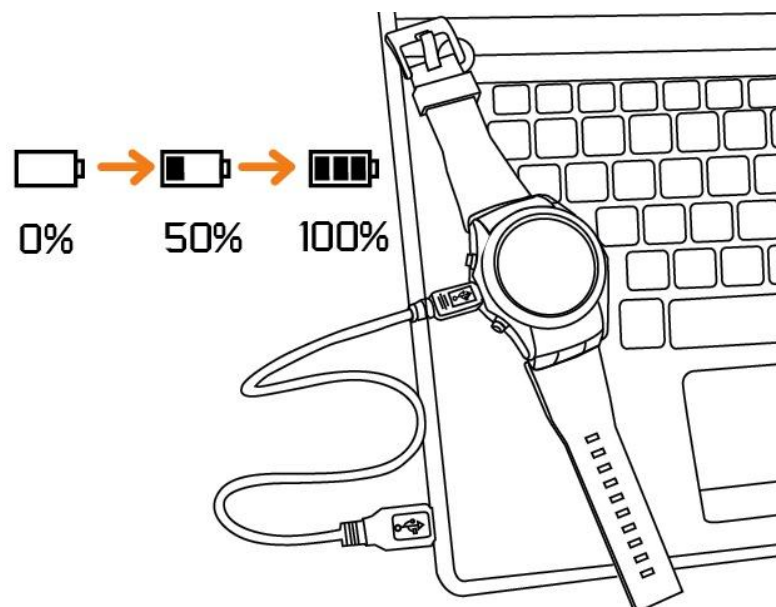

2.5 Charge the battery

The initial state of the battery is charged about 25%. Please empty the battery fully and charge to full battery for the first 3 times to achieve the best use of the battery.

- Connect the USB to your computer or adapter.
- Insert charger connector USB charger jack
- At this time, battery indicator on the right top of the screen will be flashing and circulation; if the Watch phone is turned off during charging, the charging indicator will appear on the screen to indicate the charging process. If the watch phone is switched off it may take some time until the battery indicator appears on the screen.
- Charge has been completed when the battery indicator on the top right corner shows full battery and stopped flashing. The screen also shows image of "Charge Completed". This process usually takes 2 ~ 3 hours. During charging batteries, it is normal that cell phone and charger become warm.

Note:

- *Battery should be immediately put to charge when the phone automatically shuts down or shows "battery low" warning.*
- *The standby and talk time is base on an ideal environment. In practical situations, the standby and talk time can vary due to the network, work environment and usage.*
- *Disconnect the charger after battery is fully charged.*
- *If the charger is not disconnected after charging, after some time the battery will lose the electricity and start getting charged again. This process will reduce the battery life.*

2.6 SIM Card

Warning! Always make sure the watch phone is switched off before removing the battery.

2.6.1 SIM Card Usage

A valid SIM card GSM must be inserted in the phone before using the phone. Any GSM SIM card can be used in your watch phone. Please note the watch phone is not operating on 3G SIM cards. In order to prevent loss and damage of information saved on your SIM card, touching the metal plane area should be avoided, and keep the SIM card away from electric and magnetic area.

2.6.2 SIM card insertion and removal

Figure 1 Open the back cover by moving to the left

Figure 2 Remove the battery
