15

The second chapter Lenovo Q&A Smartphone

Q: how the smart phone use is what operating system

The system?

The adoption of smartphones: Excuse me, what is the operating system

The system?

A: the mobile phone is used in Android operating system, the operation

As the system gets a phone users from its founding in 2007

Wide acceptance. At present, the operating system is Android

One of the most users of the smart phone operating system in the world.

Q: how to Lenovo Mobile phone to install third party applications?

A: Lenovo smartphones in the factory has been preset number

The popular application of ordinary users, can meet the basic

Demand. The user can also from the electronic market (such as music store)

And the third party management software to download and install the other third party shall

Use, or through the USB data line copy third party applications

Order to the phone and install. Please note that only Lenovo preset

Application is the result of association test and guarantee the use effect,

The application of the other users to download the application must be confirmed by

Google authorization and access to the digital signature can ensure

Use effect. If the user needs to install the non Google Award

16

application, need to - > security hook is arranged on the main menu - >

Choose the unknown sources that option. Application of non certified storage installation

In the risk, all because of the user to install the non authorized applications

Caused by hardware and software problems caused by the association does not bear the responsibility to repair.

Lenovo recommends that users to download the official certification.

Application of Association recommends that users to download the official certification.

Q: I would like to ask the third party application download and install the need to charge

?

A: the current Android application more than half are free

The installation of this part, and download the application do not need to charge.

However, download the data flow of the need to charge,

Standard fees please consult the local operators. It is recommended that you

Under the environment of WLAN to download the application, and without number

According to the flow of monthly package or packages flow exhausted condition

Next, select any of the following a way to close the data even

Answer: to close main menu - > Settings > wireless and network number

According to the connection

The number of according to the connection; close the main menu
-> Settings > ->SIM card management

The data connection; close dropdown in the status bar to open data connection

Guan. Because the user person without closing data connection brought

High flow cost association aspect does not bear the relevant responsibility.

17

Q: discovery system become more and more slowly the how to deal with?

A:1, intelligent mobile phone and computer like, may be a long time

Running multiple programs found that after the system becomes "card",

Now restart the mobile phone can solve the problem; 2, if the restart

Also can not solve the problem of words, recall recently whether you

Download and install some new third party applications, enter

Settings - > application, try uninstalling recently installed program after

Restart the mobile phone; 3, if the above two methods can not solve the

Your problem, enter the settings - > Reset > backup and restore

Restore factory settings

Recovery

Restore factory settings, the mobile phone can restore factory settings, please note

Italy! Note that the use of mobile phone built-in backup and do this operation

Restore the backup your important data tools, or you can use the

Three party tools.

Q: the battery is not durable and how to deal with?

A: intelligent mobile phone for large screen mobile phone, and support the function of the

More, if you long time to surf the Internet, watch videos, play games,

So the battery life time will be reduced. So

How can ability as much as possible to extend the battery life time and so

With life? When you do not require wireless connection, close

18

Closed WLAN, Bluetooth, in dim light or at night,

Suggest that you reduce the brightness of the screen, can not only extend the mobile
phone

With time, can better protect your eyesight.

one card number in the standby state, the other card number is in shutd own

Status. You can go to Settings > wireless and network - > double card

Single standby settings - > standby card slot choose to view or change the number

State.

20

The third chapter install and charge

3.1 installation of mobile phone

1 press the button arrow upward (oblique corner force)

Take down the mobile phone back cover.

21

2 press the button arrow will (U) SIM card inserted

(U) SIM card slot, insert (U) to ensure that the SIM card

Metal face down ((U) SIM card is the metal contact surface

Easy scraping damage. Before installation, please be careful of the

Out).

3

The memory card into the card slot (you may need to the amount of outsourcing

Buy memory card), as shown below.

22

4

The battery metal contact end corresponding body shrapnel, and will

A square groove batteries into the fuselage, as shown below.

5

The mobile phone cover gently on the body, and as shown below

In the arrow downward pressing, until completely and fuselage

Fit.

23

3.2 remove the battery, (U) SIM and memory card

1 the mobile phone shutdown and remove external power supply.

Note:

*

In the boot state can directly remove the battery

Can damage the (U) SIM card and mobile phone.

*

In the boot state directly unloaded memory card

May cause the transmission to the mobile phone file lost

The loss of mobile phone, or lead to abnormal phenomenon,

Does not work.

2 remove the cover of mobile phone.

3 according to the direction of the arrow in the diagram below the battery out.

24

4 according to the direction of the arrow in the figure below (U) the SIM card out.

5 the memory card is removed from the card slot, as shown below.

25

3.3 for mobile phone charging

The charger plugged in, then the charger plug

Head is inserted into the mobile phone charging socket, as shown below:

Note: be careful operation, do not forcibly pulled out

The charger plug, otherwise you may damage the mobile phone

Or charger.

26

*

Your mobile phone attached to the battery must be finished before use

Full charge.

*

When charging do not remove battery or (U) SIM card.

*

If the battery runs out, the mobile phone will automatically shut down.

fifth chapter The main function Guide

When the logo network operators in the mobile phone appears on the screen, you can make or receive calls. A mobile phone information in the top right corner of the screen shows the network signal strength. The call to influence the quality of obstacle is relatively large, so the mobile in small range can effectively improve the quality of the communication.

National calls

Enter the phone number in the standby state, and then press the dial icon starts the call. The other is switched on, the screen will display the call status information. The end of press end call icon to hang up the phone.

5.2 contact

Relevant information you can use contact function store contact.

Note: (U) the number and capacity of the relevant records SIM card storage.

31

The sixth chapter text input

This mobile phone has input method for you to provide. You can also download other input method to install to use.

In the mobile phone function input is allowed:

The input, edit short messages;

The input, edit contact name;

.....

Input method

Choose the input method, you can click on the icon to switch the input mode according to the input method interface: digital, Chinese, symbols or letters.

You can also install the other input methods to.

32

The seventh chapter Lenovo Mobile Internet products

If you buy lenovo mobile phone built-in "Lenovo Mobile Internet products", you can directly use the corresponding function. Such as

Fruit is not built into the mobile phone function, you need to realize the corresponding function site through other way log association.

7.1 music store

Lenovo Group to build the store is open, security, local, social Android (Android) should be

Use the download platform, is currently one of the few Android App store some security. Lenovo store has a mass of genuine stress

Use, promise to provide non suction fee, no trojan virus security application download service to users. Lenovo store is divided into Web, Phone and Pad

The three version, according to the needs of different platforms provide personalized content and services.

Music store has two access mode:

*

The user can login Lenovo store Webpage:

[Http://app.lenovo.com](http://app.lenovo.com);

33

*

Users can install the music store client to download the application. In order to ensure the information synchronization, also can be in the music store after the visit, the use of mobile phone number or email as a user name registered "associative account".

Music store client download mode:

*

Login Webpage <http://app.lenovo.com> music store,

Then click the download button home page;

*

Two dimensional code download:

Phone version download music store

Pad version download music store

More music store information, please pay attention to music store Sina official micro-blog: @ music store.

Welcome to search "music store", more wonderful!

34

7.2 Le Anquan

Music is the development of a security association system and kernel set defense, peep proof, anti suctionfee, theft proof, anti virus

In one intelligent mobile phone security software. A key medical advanced cloud killing technology, 5 seconds quickly kill, time-saving.

Active interception

Provides marking function (specified intercept), automatically blocking malware suction fee, save flow. Rights management, prolonging the standby at any time independent management software, shut down power consumption procedure permissions. Has the highest protection ability, anti suction cost function of the super, thoroughly eliminate malicious software peep user privacy and call, text.

35

7.3 cloud services

The cloud service is Lenovo developed a personal mobile phone in order to prevent data loss, provides amobile phone data backup and recovery service software. Through the network will be in the mobile phonedata backup to the cloud. Then can through the mobile phone, tablet computer or Internet to view and manage the information in the cloud.

The cloud service web site: <http://pim.lenovo.com>.

Data backup and perfect

Will you mobile phone, SMS, contacts in the call records and photographs and other information securitybackup to the cloud cloud services, safe and reliable, never missing data!

Management, intelligence can use Web Webpage manage your data, intelligent merge contacts, information management more easily!

Convenient key migration key backup and restore of all mobile phone data, with the associative flow mostnew compression technology, more convenient, zero seconds!

36

Easy to shoot or pass

Will take beautiful instant upload, can cloud backup and management. Communication log backup process optimization, the cloud will automatically merge completely the same contacts, contacts may cloud thanmobile phone contacts contact less, convenient and quick.

The whole platform support for Android, Symbian iOS, full platform support, let the replacement becomes simple.

7.4 music portal (Lenovo site navigation)

Music portal is to provide a new convenient Internet portal for mobile internet. The news of current events,timed to buy hot, life more commonly used web site. Remain within doors control world. Music portal web site: <http://m.idea123.cn>.

37

The common telephone, one touch dial

The first provides Webpage commonly used phone click dial service site navigation, included the mostcomprehensive life common telephone number. Convenient your life. Remain within doors, known to the world insight news and current affairs, grasp the popular vocabulary network hot words, the daily show,allowing you to remain within doors know everything. Web site included, atoxic rich web site included,included are suitable for mobile phone browsing, music content after security authentication, safe non-toxic.Abundant life from music portal.

7.5 eggplant pass quickly

Eggplant fast pass is Association launched a mobile phone content transmission tool. Data transmission path through the establishment of automatic by mobile phone between, achieve can high-speed receiving and sending data in the absence of external WLAN network or telephone network, process because it isdirect transmission between mobile phone, so no need to

38

Consumption of any user of Internet traffic. The user has the advantages of simple operation, no pairingcomplex configuration, no need to login account, add friends, to support the people to each other. Allow users to get rid of the data line, Bluetooth and other complex ways to share, with a simple, intuitive interaction allows users to experience close line social joy shared with others.

Eggplant fast pass Web site: <http://kc.lenovo.com/>.

The eighth chapter features quick reference

Function	description	selection
Call records	View all recent call, missed, dialed, answered	The main menu - > call records

Note: the initial PIN code is generally 1234.

41

The common problems in the ninth chapter

Any problems in the use of mobile phone in the process, please refer to the following methods to solve. If the problem persists, please immediately and Association designated contact the dealer or repair business. The appearance of the screen to enter the PIN code input (U) SIM card with valid PIN code. If you don't know PIN code, contact your network operator immediately. The appearance of the screen to enter the PUK code PIN code is entered incorrectly three times (U), your SIM card will be locked, to unlock, you must enter the PUK code, if you don't know PUK code, contact your network operator immediately. The appearance of the screen (U) is inserted into the SIM card information confirmation (U) SIM card is installed correctly. Check (U)SIM card is working properly, it may be defective or faulty. If so, please deliver the network operators to resolve.

42

The display is not in the service area, the status icon network fault check the signal strength. If there is no network signal, you can network blind area in the basement or buildings in other areas to receive signals, please. There is another situation, you may be in the network does not cover the area, can ask your network operator provides network services. The sound quality is poor, echo or noise makes conversation difficult to hang up the phone, dial again, network operators may

Contact you with a better quality of the line. Standby time varying signal short seat is weak, a long time to find the signal caused by mobile phone. When you do not want to answer the phone, can temporarily shut down; or the battery usage time is too long, the service life of the battery at the close, please replace with new battery.

Mobile phone can not boot check the battery or charging. In charge during the open mobile phone, check. Mobile phone if long time static

43

Easy to make excessive battery discharge, at this time can not boot, the charging start long period after noresponse, need to wait after the restoration of electricity to boot.

Cannot send a short message, you need to check your service center number option, to see if you have set the SMS center number or the number of errors, you may SMS service is not open, or short message object is invalid, network operators or your area did not support the service (specific can consult the local network operators).

Not charging

There are three possibilities: one is the mobile phone charger bad work, you may go and Association designated repair operator or distributor Alliance

Network; two is the environmental temperature, can change the charging environment; three is bad, can check the charger plug.

Contact could not add data contact storage is full, delete some of the original useless items.

44

Can't choose some function

Do not open the network operators of the service or the location is not supported by this service. Please contact the Association designated repair business, distributor or network operator contact.

45

The tenth chapter technical parameters

Routine

Product Name: TD-LTE digital mobile phone

Model: Lenovo A916

System: Android

The basic parameters

Size: about 149.5 mm x 76.6 mm x 8.7 mm

Weight: 169 grams (with battery)

Battery capacity: 2500 Ma

Talk time: the upper limit is approximately 1284 minutes *

Standby time: the upper limit is about 203 hours *

* theoretical value, depending on local network circumstances.

46

The eleventh chapter important safety information -- electromagnetic radiation performance (important safety information -- electromagnetic radiation performance index (SAR))

This type mobile phone complies with international and national standard about the radio electromagnetic wave radiation volume requirements, please feel at ease to use!

This kind of mobile phone is a radio transmitter and receiver. Its design and manufacturing standards do not exceed the International Commission on non ionizing radiation protection (ICNIRP) proposed radio frequency(RF) limit. Part is a comprehensive specification of these limits, and the provisions of the radio frequency energy is applicable to the general public of the allowable level. These guidelines were developed by the independent scientific organization in scientific research conducted regular and comprehensive assessment of the. These standards have

been contains certain safety factor, to ensure that all ages and different health status of population security. SAR (Specific Absorption Rate) refers to the energy of the electromagnetic wave absorption ratio, referred to as the specific absorption rate, is a unit of measurement to measure, applicable to the provisions of the international code of Public mobile phone specific absorption rate limits are not higher than the average for every 10 grams of human tissue 2 Watt / kg (W/kg) *, in order to provide the public with more protection, while also taking into account the deviation measurement, this limit has included a safety margin.

47

SAR values of the test is based on the standard testing procedures, with a maximum output power of mobile phones to test all kinds of frequency, in view of the test results are determined at the maximum power level, the actual your mobile phone use in the general case when the SAR value is far lower than the maximum value of the test. This is because the mobile phone we design for you can work in a variety of power output, and the practical work in connection with the power network using only the level required, as is usually the case, you are closer to the base station, mobile phone radiation power is low, while the resulting absorption rate is smaller.

After testing, the product of electromagnetic radiation of specific absorption rate (after testing, the product of electromagnetic radiation of specific absorption rate (SAR) to a maximum of 0.233 W/Kg, in line with national standards, in line with the national standard GB 21288-2007 requirements. * ratio may be due to countries or regions, the test environment, the network band and different test of single vary the rate of absorption, the use of mobile phone accessories and parts may also lead to different specific absorption rate.

The twelfth chapter important safety information -- medical equipment

Any radio transmitting equipment (including the equipment) are likely to medical equipment on the interference caused by improper protection function. If there are problems or uncertainty of medical equipment can shield the external RF energy, please consult a medical staff or medical equipment manufacturers. On the prohibition of the use of electronic devices or disable mobile phone wireless transmission function place, please abide by the relevant provisions of. A pacemaker fitted with a pacemaker people in the use of this product, please refer to such as the next suggestion:

*Should always keep the cell phone and a pacemaker is greater than the distance between 15.3 cm (about 6 inches).

* To carry a cell phone, it should not be placed on the chest pocket.

* Should use and wear pacemakers different side ear answer telephone, to reduce potential factors causing interference.

48

Hearing aid, cochlear implants

Hearing aid, cochlear implant users in the use of this product, please consult the authorized medical personnel and references of medical equipment

Supplier's instructions. If you suspect a interference, please shut down and the mobile phone into a distant location.
